What is CityScope?

CityScope is a web application that provides tailored recommendations for places to visit in Cincinnati.

How it works

Using CityScope is as easy as typing in your desired destination into the search box. Looking for coffee shops? Simply enter “coffee shops” and hit search. A curated list of coffee shops in Cincinnati will populate the screen, offering you a diverse selection to choose from.

Our Design

Features

- Comprehensive Search: Explore a wide range of categories, from dining to entertainment
- Sorting Options: Customize your search results based on your priorities (price, rating, reviews)
- Real-Time Updates: Access up-to-date information on the latest venues and attractions

Challenges

- Figuring out how to utilize the Yelp API to fetch business data
- Overcoming the lack of experience with React presented a learning curve
- Determining how to make the web application visually appealing and user-friendly
